

Our basic philosophy

The Western Reserve Pole Building Co. was founded in 1973 with the concept of offering quality-built, custom-designed buildings at a reasonable cost. We have no standard designs or sizes. Every building we erect reflects the thoughts and specific requirements of each individual customer.

We have developed our philosophy in appreciating that when an individual spends time and money on a building which will be for that individual's own use, the building should reflect the owner's personal tastes. A "stock building" or "standard plan" is not the way we operate our business.

Quality ever since our first barn.

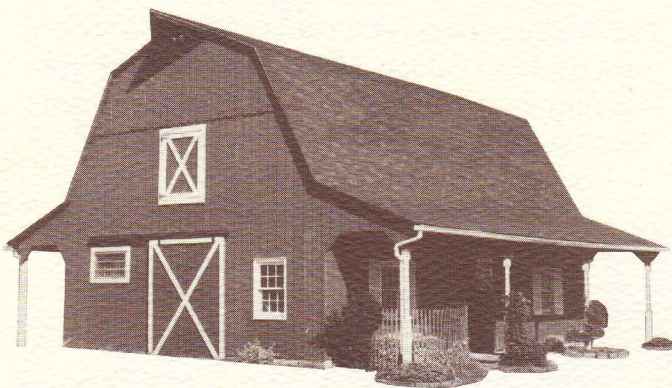

Est. 1973

A great deal of care and personal pride go into the construction of our buildings.

Care and personal pride...this thinking has developed the craftsmanship which goes into every building we construct. Our crews maintain these high standards – a standard that produces a quality building ...at a reasonable price... the way you expect it.

We would like the opportunity to discuss your building needs, and to prepare an estimate at no obligation to you.

As principles & owners since 1973, our family business' desire is to assure our continued quality service.
